

Mini - MIMO

A little bit can go a long way.

The cash and coin recycling system you love is about to get a little more...mini.

MIMO was engineered to increase your bottom line by elevating and automating cash handling operations. Spending less time counting cash helps you spend more time focusing on your customers and core business. You upgrade the technology in your pocket to stay in the game. Why not do the same with the technology in your cash room?

This year, we sought out to give the beloved original **MIMO** some new, high quality features, and a much more compact framework. The result is **Mini-MIMO**, a machine that allows you to enjoy the accuracy and speed that made **MIMO** famous, in a much smaller package. Seamless hardware and software upgrades make this hotly anticipated version of **MIMO** a trustworthy addition to any business, no matter your size!

Mini-MIMO is less than 4.5 feet high, and only 16 inches wide!

The most economical of all the **MIMO** Cash and Coin Solutions, **Mini-MIMO** is perfect for those with a lower cash volume, and a smaller amount of available space.

MIMO

Our new Mini-MIMO is a scalable cash and coin recycling system specifically designed for small to mid-size retailers. The compact design includes all of the cash automation features our customers have come to expect from the MIMO Product Line, streamlined for those with minimal space. Everyone's cash management needs are different, and the modular-based system still allows for specific customized configurations.

Feature	Mini-MIMO
Deposit Capacity	50 notes
Deposit Speed	3 notes per second
Number of Modules	Up to 6
Recycler Denomination Support	Up to 6
Module Capacity	120 – 500 notes (depending on module)
Dimensions	51.75"H x 16"W x 29.25"D

Mini-MIMO.

Pint-sized, microscopic, itsy-bitsy.
Whatever you want to call it,
Small is the new Big!
